

ONE PIECE DECORATIVE INSULATION AND INTERIOR PANEL ASSEMBLY

ABSTRACT OF THE DISCLOSURE

5 An insulated wall for a mobile platform is formed from at least two layers. A
first layer includes an insulation material. A second layer includes a flexible
material having an outer face with a decorative pattern and an inner face
attached to the first layer. The wall is mounted in the mobile platform with the
outer face of the second layer having the decorative pattern forming a mobile
10 platform innermost facing surface. By attaching a flexible material layer to the
insulation material, the insulated wall can be formed into rolls and rolled out
during installation in a single step. In another embodiment, fasteners are
preinstalled in the wall for fastening the wall to the mobile platform. In yet another
embodiment, a method for insulating a compartment of a mobile platform is
15 provided.
